SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Material and Methods Study was planned and conducted in ART centre of a tertiary care hospital in Mumbai after getting approval from Institutional Ethics Committee.
Consent: Consent was obtained from all the participants and confidentiality was maintained at all levels irrespective of HIV status.
Inclusion and Exclusion Criteria
In case of four couples, spouse was reported to be at native place and HIV status report of spouse could not be confirmed, so they were excluded from the sample.
Attrition
Three of them did not wish to participate due to personal reasons.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical software used was IBM SPSS Version 21.0 and Microsoft Office Excel 2007.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
	Microsoft Office Excel		Suggestion: Microsoft Excel, RRID:SCR_016137(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analysis was done by using Chi-square test, Fishers exact test, unpaired t-test and multivariate analysis.	Chi-square test
	Fishers exact test
	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
