SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: METHODS This study was exempted from ethics approval and informed consent by the Institutional Review Board of the Seoul Song Do Hospital due to its retrospective nature (No. 2020-014).
IRB: METHODS This study was exempted from ethics approval and informed consent by the Institutional Review Board of the Seoul Song Do Hospital due to its retrospective nature (No. 2020-014).
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
The normal range of mean maximum resting pressure (MRP) used in this study was 71 to 90 mmHg for male patients and 64 to 84 mmHg for female patients .
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The data were evaluated using Microsoft Excel (	Microsoft Excel		Suggestion: Microsoft Excel, RRID:SCR_016137(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analysis The Mann-Whitney test and chi-square test were used to compare the normallow mean MRP and high mean MRP subgroups .	Mann-Whitney test
	chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
