SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved by the Institutional Review Board of the National Taiwan University Hospital (IRB number: 201211025RIB).
Consent: Written informed consent was obtained from the caregivers of patients, as patients were in a comatose state.
Inclusion and Exclusion Criteria
Study Population All patients eligible for inclusion in the study had been admitted to the National Taiwan University Hospital between May 2011 and December 2017.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Patients with > 30 mL unilateral ICH at the basal ganglia, aged > 18 years, who underwent ICH surgery with intracranial pressure (ICP) monitoring and had brain temperature data for >= 72 h post-surgery were included.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data were analyzed using SPSS version 14.0 for Windows (SPSS IBM Corp., Armonk, NY, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical Analyses The chi-squared test (or Fishers exact test) and t test were used to compare outcomes between patient subgroups for categorical and continuous data, respectively.	chi-squared test
	Fishers exact test
	t test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
