SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: MATERIALS AND METHODS C4 Project Trial Design The Johns Hopkins Medicine Institutional Review Board (Study Number: NA_00071963), Johns Hopkins Bayview Medical Center (JHBMC) Patient Safety Board, and the Directors of the Medical ICU (MICU) and Cardiac ICU (CICU) all reviewed and approved the C4 Project.
Consent: Patients were approached by our staff to provide informed consent.
Inclusion and Exclusion Criteria
Randomization and Patient Characteristics All patients admitted to the CICU and MICU were eligible for this trial, and there were no exclusion criteria.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
The C4 Project was a randomized, nonblinded controlled trial to evaluate the utility of a chaplain PN, who served as a health liaison for patients and their families, elicited their values and preferences, and organized admission, follow-up, and ad hoc family meetings.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Of note, all analyses were performed using STATA 15.1 (College Station, TX) software.	STATA		Suggestion: Stata (RRID:SCR_012763)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Intervention and control group characteristics were compared using Wilcoxon signed rank tests for continuous variables and Fisher exact test for categorical variables.	Wilcoxon signed rank tests
	Fisher exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
