Document Identifier: **PMC8578128**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Although angioscopic evaluation at follow-up angiography as well as staged PCI for other lesions was recommended for all patients, this was not performed when informed consent could not be obtained or when a specialist for angioscopic evaluation was not available.
IRB: This study was approved by the Medical Ethics Committee of Kansai Rosai Hospital and all patients provided written informed consent.
Inclusion and Exclusion Criteria
Patients who exhibited any event of earlier stent failure, such as in-stent restenosis, or who could not receive successful angioscopic evaluation were excluded from the study.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All calculations were performed using IBM SPSS Statistics package version 27	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Continuous variables with and without homogeneity of variance were analyzed by Students t-test and Welchs t-test , respectively .	t-test
	Welchs t-test
Categorical variables were analyzed with Fishers exact test for 2x2 comparisons .	Fishers exact test
For comparisons of more than 2x2 , the Mann-Whitney test was used.	Mann-Whitney test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
