Document Identifier: **PMC8582609**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Materials and methods Study design Institutional review board approval was obtained.
Consent: One patient was excluded as the parents did not consent to a postoperative SPECT-CT bone scan.
Inclusion and Exclusion Criteria
One patient was excluded as the parents did not consent to a postoperative SPECT-CT bone scan.
Attrition
One patient was excluded as the parents did not consent to a postoperative SPECT-CT bone scan.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All analyses were performed with use of the SPSS statistics (version 23 SPSS, Chicago, Illinois).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
For statistical purposes, the Shapiro-Wilk test was used to determine whether our data met the assumption of normal distribution required for a parametric test.	Shapiro-Wilk test
For the data without normal distribution, the Mann-Whitney test was used.	Mann-Whitney test
A chi-squared test was used to compare categorical data.	chi-squared test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
