SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was conducted according to the Helsinki Declaration and approved by the local ethics committee (ID: 2017SL046).
Consent: All the patients gave their written informed consent before inclusion in the study.
Inclusion and Exclusion Criteria
The patients with fibromyalgia were excluded at enrollment.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Principal component analysis (PCA) was performed by dimension reduction processing with SPSS statistical software.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
Structural equation modeling (SEM) was analyzed using Amos ver. 23.0.0, and any possible relationships between latent variables were evaluated using SEM. Fig. 1 Flow chart of inclusion and exclusion criteria	Amos		Suggestion: AMOS (RRID:SCR_013067)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Continuous variables with a normal distribution were evaluated using a two-sample t test.	t test
Analysis of variance (ANOVA) was employed to look for multigroup differences, and unordered categorical variables were assessed by the Chi-squared test.	Analysis of variance
	ANOVA
	Chi-squared test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
