SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Field Sample Permit: 2.5 Ethics statement The study was conducted according to the Declaration of Helsinky and was approved by the Ethics Committee of the George Emil Palade University of Medicine, Pharmacy, Science, and Technology of Targu Mure (No. 27421.11.2018).
IRB: 2.5 Ethics statement The study was conducted according to the Declaration of Helsinky and was approved by the Ethics Committee of the George Emil Palade University of Medicine, Pharmacy, Science, and Technology of Targu Mure (No. 27421.11.2018).
Consent: A written consent was signed by the parents or legal representatives and children were also asked if they agreed to participate to this study.
Inclusion and Exclusion Criteria
The inclusion criteria were: fully erupted permanent molars, macroscopically intact surfaces, enamel aspect from sound to different degrees of noncavitated carious lesions.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: A total of 96 children aged 7 to 15 years old were examined in order to detect and diagnose any alteration of the occlusal morphology of the young permanent molars, as the first part of a preventive program which included also the evaluation of caries risk and therapeutic indications.
Randomization
not detected.
Blinding
All investigators are specialists with over 15 years of practical activity and the recordings were made in a blind manner .
Power Analysis

not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
7 (GraphPad Software, San Diego, CA).	GraphPad		Suggestion: GraphPad Prism, RRID:SCR_002798(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The level of agreement between the 2 diagnostic methods was calculated based on McNemar test.	McNemar test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
