Document Identifier: **PMC8590077**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: 77 lung cancer tissues and respective non-cancer lung tissues were obtained in 2008 with informed consent and Institutional Review Board permission.
IRB: 77 lung cancer tissues and respective non-cancer lung tissues were obtained in 2008 with informed consent and Institutional Review Board permission.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Each experiment was performed with three technical replicates , and three biological replicates were carried out for each sample.

Type: Each experiment was performed with three technical replicates , and three biological replicates were carried out for each sample.	
Number: Each experiment was performed with three technical replicates , and three biological replicates were carried out for each sample.	
Cell Line Authentication	
Contamination: The cell lines were tested for potential mycoplasma contamination and were confirmed to be mycoplasma negative.	
Data Information	
Identifiers: Protein quantification was measured using BCA Protein Assay. 20mg of total protein from each sample was loaded on a 4-12 Bis-TrisNuPage gel (NP0335BOX, Thermo Fisher) and transferred to 0.22 mM PVDF membrane (ISEQ00010, Millipore) at condition of 10 volt, time 60 minutes.	ISEQ00010
Identifiers: P values less than 0.05 were accepted as significant, *P < 0.05, **P < 0.01, ***P < 0.001. Bioinformatics analysis For CLIP-seq and FLASH-seq analysis, aligned reads were obtained from GSE89276 and GSE70061.	GSE89276
	GSE70061

Antibodies used in this study are: HNRNPA2B1 (sc-374053 , Santacruz) ,	sc-374053		
Coverslips were then placed cell-side down to ensure that samples were completely immersed in 50 mL of hybridization solution 2 x SSC , 10 (vv) formamide , 10 (wv) dextran sulfate , 0.5 (wv) BSA in PBS containing 250 nM CDK6 3UTR or negative control (LacZ) Cy3-labelled FISH probes (Generay biotechnology) and HNRNPA2B1 antibodies (diluted at 1300 , Santa Cruz) inside of a humidified Petri dish for 4 hours at 37degC .	CDK6		
	HNRNPA2B1		
Then , coverslips were incubated with a secondary antibody (goat anti-rabbit-Alexa488 , Life Technologies) for 30 minutes at 37degC .	anti-rabbit-Alexa488		
, AGO2 antibody (ab186733, Abcam) and DHX9 antibody (sc-137232, Santacruz), and IgG were added to the cell lysis.	AGO2		
	DHX9

Comparisons of multiple groups were performed using 1-way ANOVA followed by Tukeys multiple comparisons test.	ANOVA
	Tukeys multiple comparisons test
Comparisons between 2 groups were performed using the students t test.	students t test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
