Document Identifier: **PMC8591776**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: The GSE53625 cohort was derived from a cohort of 179 ESCC patients with follow-up information (minimum of 5 years).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Data Information
Availability: All clinical and microarray data of these patients were publicly downloaded from the GEO website (https:www.ncbi.nlm.nih.govgeoqueryacc.cgi?acc=GSE53625).

Identifiers: Materials and Methods Patients and Data Sources The set of array-based RNA	GSE23400

expression data for ESCC were obtained from human ESCC datasets (GSE23400, GSE20347, GSE29001, GSE38129, GSE26886, and GSE53625), which were downloaded from the GEO website https:www.ncbi.nlm.nih.govgds).	GSE20347
	GSE29001
	GSE38129
	GSE26886
Identifiers: The GSE53625 cohort was derived from a cohort of 179 ESCC patients with follow-up information (minimum of 5 years).	GSE53625
Identifiers: All clinical and microarray data of these patients were publicly downloaded from the GEO website (https:www.ncbi.nlm.nih.govgeoqueryacc.cgi?acc=GSE53625).	acc=GSE53625

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
Rabbit polyclonal antibody anti-human MXD1 (Atlas Antibody , HPA001599) was diluted 1:500 in DAKO antibody diluent	Rabbit polyclonal antibody anti-human MXD1		
	anti-human MXD1		Suggestion: (Creative Diagnostics Cat# CPBT-39395GH, RRID:AB_2373374)(link)
	HPA001599		
Rabbit monoclonal antibody anti-human programmed cell death 1 ligand (PDL1) (ABCARTA , PA167) and mouse anti-human CD8 monoclonal antibody (ABCARTA , PA067) were used.	anti-human programmed cell death 1		
	PDL1		
	anti-human CD8		
Software and Algorithms			
TCGA Cohort TCGA data were downloaded from the UCSC Cancer Browser website, together with accompanying clinical information.	UCSC Cancer Browser		
14 The prediction process was implemented using the SubMap module in the GenePattern platform (https:cloud.genepattern . orggppages) .	GenePattern		Suggestion: GenePattern (RRID:SCR_003201)(link)
The Limma R package was used to identify significantly differentially expressed genes (DEGs) between the MXD1-low and MXD1-high groups based on the threshold of fold change and false discovery rate (FDR) or p-value.	Limma		Suggestion: LIMMA (RRID:SCR_010943)(link)
KEGG) enrichment using the R package clusterProfiler .	KEGG		
	clusterProfiler		Suggestion: clusterProfiler (RRID:SCR_016884)(link)
15 The heat maps of the representative DEGs were generated using the ComplexHeatmap package in R version 3.6.1 .	ComplexHeatmap		Suggestion: ComplexHeatmap (RRID:SCR_017270)(link)
18 Statistical Analyses Statistical analyses were performed using SPSS (version 23.0 IBM)	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
, GraphPad Prism version 8.00 (GraphPad Software), and R version 3.6.1 (R Core Team).	GraphPad Prism		Suggestion: GraphPad Prism (RRID:SCR_002798)(link)
	GraphPad		Suggestion: GraphPad Prism, RRID:SCR_002798(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Pearsons chi-square test and Fishers exact test were used to comparing the categorical variables.	chi-square test
	Fishers exact test
A Pearsons correlation analysis was used to evaluate the association between 2 continuous variables.	Pearsons correlation
Survival analysis was performed using a log-rank test.	log-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
