SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Patients This retrospective analysis was approved by the Institutional Review Board of Asan Medical Center and was conducted in accordance with the Declaration of Helsinki (IRB number: 2014-1064).
Consent: This study was a retrospective study and informed consent was waived.
Inclusion and Exclusion Criteria
Patients with monogenic IBD, such as those with interleukin-10 receptor mutation and X-linked inhibitor of apoptosis deficiency, were excluded from this study.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: We retrospectively analyzed patients who were diagnosed with CD before 18 years of age and were registered at the inflammatory bowel disease (IBD) center and Asan Medical Center Childrens Hospital between March 2000 and December 2013.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was performed using SPSS version 18.0 (IBM Corp., Armonk, NY, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
We used chi-square tests or Fisher exact tests to compare binominal variables.	chi-square tests
	Fisher exact tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
