SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Inclusion and exclusion criteria All types of studies performed on patients with classical TN undergoing RFT with or without a control group were included.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
The risk of bias of randomized controlled trials (RCTs) was assessed using the Cochrane Risk of Bias Tool (15) and the risk of bias of non-RCTs was performed using the non-randomized studies of interventions-I tool (16).
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Materials and methods Search strategy Previous publications written in English were searched using the PubMed, Embase and Cochrane databases.	PubMed		Suggestion: PubMed (RRID:SCR_004846)(link)
	Embase		Suggestion: EMBASE (RRID:SCR_001650)(link)
	Cochrane		Suggestion: Cochrane Library (RRID:SCR_013000)(link)
The present review was conducted following the guidelines of the Preferred Reporting Items for Systematic Reviews and Meta-analyses statement and the Cochrane Handbook for Systematic Reviews of Intervention (14), with the exception of protocol registration.	Cochrane Handbook for Systematic Reviews of Intervention		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
