Document Identifier: **PMC8597017**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: All participants gave written informed consent, and the study was approved according to the guidelines of the Helsinki Declaration by the external Medical Ethics Committee of the University Medical Center Utrecht.
IRB: All participants gave written informed consent, and the study was approved according to the guidelines of the Helsinki Declaration by the external Medical Ethics Committee of the University Medical Center Utrecht.
Inclusion and Exclusion Criteria
For the present analyses, we included participants who took part in at least two rounds (N = 6,391) and excluded pregnant women only for that specific round (round 1-6: 77, 43, 18, 3, 1, and 1, respectively).
Attrition
not detected.
Sex as a biological variable
METHODS Population The Doetinchem Cohort Study (DCS) is a prospective, population-based cohort study including, at baseline, 7,769 men and women aged 20 to 59 years living in Doetinchem, the Netherlands, who were predominantly of Dutch Caucasian descent, between 1987 and 1991 (round 1).
Subject Demographics
Age: METHODS Population The Doetinchem Cohort Study (DCS) is a prospective, population-based cohort study including, at baseline, 7,769 men and women aged 20 to 59 years living in Doetinchem, the Netherlands, who were predominantly of Dutch Caucasian descent, between 1987 and 1991 (round 1).
Weight: Having overweight was defined as BMI between 25 and 30 kgm2, and having obesity was defined as BMI equal to or greater than 30.
Randomization
not detected.
Blinding
not detected.

Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Descriptive analyses were performed in SPSS Statistics version 23 (IBM Corp., Armonk, New York), and GEE analyses were performed in SAS version 9.2 (SAS Institute Inc., Cary, North Carolina).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
