SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The Medical Ethics Committee of the University Medical Center of Utrecht confirmed that the LAD study does not come under the scope of Medical Research Involving Human Subjects Act (reference number WAGom13055932 Prins et al., 2019).
Inclusion and Exclusion Criteria
Care staff in training were excluded (Prins et al., 2019).
Attrition
In order to prevent bias, 37 respondents who did not fill in most of the questions in the questionnaire were excluded from the original sample (n = 589).
Sex as a biological variable
As most respondents were female (96), we did not include the gender of staff as a covariate.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
To examine the relationship between work environment characteristics, such as transformational leadership, level of teamwork, job characteristics (independent variables) and staff-reported level of person-centred care (dependent variable), multilevel linear regression analyses (random intercept) were conducted, in which staff (level 1) was nested in nursing homes (level 2).
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statements contain subjects linked to philosophy of care such as challenging behaviour, responding to the individual needs of the client and communication with the family carers (Trimbos Instituut, 2010) 5-point Likert scale (1: none of the time to 5: all of the time) 7 items Per respondent, an average score was calculated Staff-reported person-centred care Person-centred care Dutch version of the Person-Centered Care Questionnaire (PCC) (Porock & Chang, 2013) 5-point scale (1: never to 5: always) 34 items Per respondent, an average score was calculated John Wiley & Sons, Ltd 2.3 Data analysis Data analyses were performed with SPSS for Windows (version 24).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
