SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was discussed and approved by the Ethics Committee of the Affiliated Hospital of Putian University, and all patients signed an Informed Consent in Clinical Research form.
Inclusion and Exclusion Criteria
Inclusion and Exclusion Criteria Inclusion criteria included (1) the diagnostic criteria for sepsis in the Surviving Sepsis Campaign: International Guidelines for Management of Severe Sepsis and Septic Shock 20 and (2) according to the Scientific Subcommittee on DIC of the International Society on Thrombosis and Hemostasis (ISTH), a score >= 5 points was diagnosed as DIC.
Attrition
They were randomly divided into 40 cases in the TPE group, 36 cases in the HP group, and 36 cases in the control (SHAM) group.
Sex as a biological variable
21 Exclusion criteria included (1) having a history of severe allergies to plasma, HP, etc., (2) pregnant women, and (3) presence of intracranial hemorrhage or severe cerebral edema accompanied by brain herniation.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
They were randomly divided into 40 cases in the TPE group, 36 cases in the HP group, and 36 cases in the control (SHAM) group.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All statistical analyses were performed in GraphPad Prism software version 8.0	GraphPad Prism		Suggestion: GraphPad Prism (RRID:SCR_002798)(link)
(GraphPad Software, Inc.).	GraphPad		Suggestion: GraphPad Prism, RRID:SCR_002798(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Differences between all groups were assessed through one-way analysis of variance (ANOVA) followed by Tukeys post hoc test .	analysis of variance
	ANOVA
	Tukeys post hoc test
Survival curves were analyzed using the Kaplan-Meier log-rank test .	log-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
