SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The research protocol was approved by the institutional review board of xxxx and performed according to the tenets of the Declaration of Helsinki.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Panel A represents one case of CCC and the MATLAB code used in this study Panel B represents the CCC boundary detection and final output values of the CCC-related parameters (acircularity index , axis ratio , perimeter , and area) .	MATLAB		Suggestion: MATLAB, RRID:SCR_001622(link)
The middle images show the foveal avascular zone extracted using our algorithm Statistical analyses All statistical analyses were performed with a commercially available software (SPSS ver .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Kruskal-Wallis H test, a subtype of nonparametric tests, was used to compare the CCC time, AI, and AR data among the study groups and subgroups in this study.	Kruskal-Wallis H test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
