Document Identifier: **PMC8601665**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This research was exempt from Institutional Review Board oversight per Title 45 Code of Federal Regulations, Part 46 of the United States, specifically 45 CFR 46.101(b)(4).
Inclusion and Exclusion Criteria
14–16 Study Population Inclusion criteria were data from patients 18 years or older and admitted to a participating hospital between January 1, 2016, and December 31, 2019.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: 14–16 Study Population Inclusion criteria were data from patients 18 years or older and admitted to a participating hospital between January 1, 2016, and December 31, 2019.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Cell Line Authentication

Authentication: Costs to the hospital for a patient's care were validated against the hospital's own financial reports.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
METHODS This was a retrospective analysis of inpatient data from the Premier Healthcare Database (PHD).	Premier Healthcare		
The box plot was created in R (v4.1.0) and all analyses were performed using SAS software version v9.4 (SAS, Cary, North Carolina).	SAS		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
χ2 tests were used to test for statistical differences between groups for categorical variables; 2 sample comparisons were evaluated using a t test for other continuous variables such as LOS and total cost of care.	χ2 tests
	t test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
