SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethics statement The Institutional Review Board (IRB) of the Ulsan University Hospital provided exemption for the review of this study and consent of the study subjects (IRB No. UUH 2020-10-013).
Consent: Ethics statement The Institutional Review Board (IRB) of the Ulsan University Hospital provided exemption for the review of this study and consent of the study subjects (IRB No. UUH 2020-10-013).
Inclusion and Exclusion Criteria
In addition, considering the occupational characteristics of soldiers who must obey orders from their supervisors, the 118 soldiers were excluded.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: The target population for this survey includes workers, owners, and self-employed persons aged >= 15 years who are living in South Korea at the time of the survey.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis The weighted data used in this study were analyzed using the IBM Statistical Package for Social Sciences (SPSS version 24.0 IBM Corp.,	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
