Document Identifier: **PMC8608774**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Inclusion criteria were aged >=65 years, osteoporosis objectively verified by dual-energy X-ray absorptiometry, independent ambulation indoors, self-reported balance, reported afraid of falling, and all reported they had changed their behaviour.
Attrition
No data were excluded due to the lack of an appropriate theme.
Sex as a biological variable
Methodology Design To answer the research question How do older women with osteoporosis conceptualise their fear of falling?,
Subject Demographics
Age: Inclusion criteria were aged >=65 years, osteoporosis objectively verified by dual-energy X-ray absorptiometry, independent ambulation indoors, self-reported balance, reported afraid of falling, and all reported they had changed their behaviour.
Randomization
Participants A purposive sample was recruited from an ongoing randomised controlled trial (RCT) at the Karolinska Institutet (NCT01417598, ClinicalTrials.gov).
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Protocol Information	
Identifiers: Participants A purposive sample was recruited from an ongoing randomised controlled trial (RCT) at the Karolinska Institutet (NCT01417598, ClinicalTrials.gov).	NCT01417598 Warning: study registration date August 15, 2011 is after study start date January 2010

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
