SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Statistical significance was set at a p-value < 0.05. 2.7 Ethical approval and consent to participate Ethical approval was obtained from the Mizan-Tepi University Ethical Review Committee.
IACUC: Statistical significance was set at a p-value < 0.05. 2.7 Ethical approval and consent to participate Ethical approval was obtained from the Mizan-Tepi University Ethical Review Committee.
Inclusion and Exclusion Criteria
not detected.
Attrition
Of these, seven public health facilities, 6 health centers (1 urban and 5 rural) were randomly selected, and 1 teaching hospital was selected purposively.
Sex as a biological variable
The total population of the study area was predicted to be 847,168 (417,751 men and 429,417 women).
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
Of these, seven public health facilities, 6 health centers (1 urban and 5 rural) were randomly selected, and 1 teaching hospital was selected purposively.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
2.6 Data processing and analysis The data collected were entered in Epi info version 7 and analyzed using SPSS version 22.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
