SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Informed consent and permission to use their data for general audit, analysis and anonymized publication was obtained from patients prior to surgery as part of the London Vision Clinic routine clinical care protocol.
IRB: Being a retrospective study, an exemption from institutional review board approval was obtained from the United Kingdom Health Research Authority.
Inclusion and Exclusion Criteria
Eyes where the intended postoperative refraction was not emmetropia (partial correction patients) were excluded for the efficacy analysis (only) .
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Surgical Protocol The closest available lens power was chosen based on an age adjusted target postoperative hyperopic sphere , whereby the target spherical equivalent was +0.66 D for a 21 year old , linearly decreasing to plano for a 42 year old.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Microsoft Excel 2010	Microsoft Excel		Suggestion: Microsoft Excel, RRID:SCR_016137(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Students t-tests were used to calculate the statistical significance of any changes in log contrast sensitivity .	Students t-tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
