Document Identifier: **PMC8613383**

# SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

**Table 1: Rigor Adherence Table**

| |
|---|
| Ethics |
| IRB: The study protocol was proved by Ethics Committee of the First Hospital of Hebei Medical University. |
| Consent: 2.1 Inclusion and exclusion criteria Inclusion criteria: (1) burn patients who met the indications for VSD treatment and underwent elective wound debridement + first VSD treatment (2) single wound type and wound location (3) no serious organic damage to important organs on admission (4) VSD treatment for 5 to 7 days (5) none tendon injury or fracture (6) wound depth was second or third degree, of which third degree burn area less than 10 total body surface area (TBSA) or total burn area less than 30 TBSA (7) with well compliance and normal spirit (8) signed informed consent. |
| Inclusion and Exclusion Criteria |
| 2.1 Inclusion and exclusion criteria Inclusion criteria: (1) burn patients who met the indications for VSD treatment and underwent elective wound debridement + first VSD treatment (2) single wound type and wound location (3) no serious organic damage to important organs on admission (4) VSD treatment for 5 to 7 days (5) none tendon injury or fracture (6) wound depth was second or third degree, of which third degree burn area less than 10 total body surface area (TBSA) or total burn area less than 30 TBSA (7) with well compliance and normal spirit (8) signed informed consent. |
| Attrition |
| not detected. |
| Sex as a biological variable |
| Exclusion criteria: (1) patients with malignant diseases (2) hepatic andor renal insufficiency (3) vascular disease (4) patients with diabetes mellitus (5) patients with infectious diseases (6) pregnant or lactating women. |
| Subject Demographics |
| Age: not detected. |
| Weight: not detected. |
| Randomization |
| not detected. |
| Blinding |

| |
|---|
| not detected. |
| Power Analysis |
| not detected. |
| Replication |
| not required. |

**Table 2: Key Resources Table**

| Your Sentences | REAGENT or RESOURCE | SOURCE | IDENTIFIER |
|---|---|---|---|
| Software and Algorithms | | | |
| The group members performed literature search on China National Knowledge Internet, Wanfang database, and Medline, and the key words were vacuum sealing drainage, insufficient drainage, incentive nursing, and burn care. | Medline | | Suggestion: MEDLINE (RRID:SCR_002185)( link) |
| All statistical analyses were performed using IBM SPSS Statistics v19.0 software. | SPSS | | Suggestion: SPSS, RRID:SCR_002865( link) |

**Other Entities Detected**

| Your Sentences | Recognized Entity |
|---|---|
| Statistical Tests | |
| 2.4 Statistical analysis Measurement data are expressed as mean and SD, and t-test is used for the comparison between groups. | t-test |
| Counting data are expressed as counts and percentage, and are analysed using the kh 2 test. | kh 2 test |

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
