SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical statement Ethical approval was obtained from the Institutional Health Research Ethics Review Committee of Haramaya University, College of Health and Medical sciences.
Consent: The study participant was informed about the purpose of the study and the importance of their participation in the study then informed, voluntary written and signed consent was obtained.
Inclusion and Exclusion Criteria
Whereas, respondents who were seriously ill and could not communicate to give information were excluded from the study.
Attrition
not detected.
Sex as a biological variable
Finally households from each Kebele were selected by systematic sampling method using the health extension family folder as a sampling frame and from each selected household females whose age is above 18 years were interviewed.
Subject Demographics
Age: Finally households from each Kebele were selected by systematic sampling method using the health extension family folder as a sampling frame and from each selected household females whose age is above 18 years were interviewed.
Randomization
All households in the district were the source population and all randomly selected households from the selected kebeles were the study population.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
35 Data processing and analysis The collected data were checked for completeness and entered into EpiData version 3.01 and exported to SPSS (Statistical Package for Social Science) version 20.0 software packages for data processing and analysis.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
A normality test of the data was done using Kolmogorov Smirnov test.	Kolmogorov Smirnov test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
