Document Identifier: **PMC8638725**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IACUC: All procedures were approved by the Animal Care Committee of the University of Calgary.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
METHODS Experimental design A total of 21 female NZW rabbits (43 weeks old) (Covance Research Products, Inc., Greenfield, IN, USA) were used in this study.
Subject Demographics
Age: METHODS Experimental design A total of 21 female NZW rabbits (43 weeks old) (Covance Research Products, Inc., Greenfield, IN, USA) were used in this study.
Randomization
Injections were randomized to either the right or left quadriceps .
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
A customized Matlab program (MatLab , R2019a) was used to calculate the percentage of contractile material for at least 50 of the total cross-sectional area of each muscle (33) .	MatLab		Suggestion: MATLAB (RRID:SCR_001622)(link)
Data analysis The data were analysed using Proc GLM in SAS (SAS for Windows 9.4 , SAS Institute , Inc .	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
A 1-way analysis of variance (ANOVA) model was used with the main effect of treatment.	analysis of variance
	ANOVA

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
