SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical consideration: The institutional ethics committee approved the study (No. INTIEC2020SPL-1464).
Consent: Informed consent was waived as the study involved the anonymized retrospective patient data.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: 2 Materials and method Study design and population: A retrospective review of the medical record of all patients 13 years old and older with IE who were admitted to the Emergency Department (Department of Internal Medicine) and the Department of Cardiology of Postgraduate Institute of Medical Education and Research, Chandigarh (India), from January 2010 to December 2020 was performed.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
We used SPSS (version 25 for Mac) for statistical analysis.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Analysis of variance was used to determine the differences between the outcome groups, i.e., died and survived.	Analysis of variance

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
