SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by The Medical Board Ethical Committee (50KBLOIL2010) and was conducted with the ethical principles of the World Medical Association Declaration of Helsinki.
Consent: All of the patients and their parents received and signed informed consent .
Inclusion and Exclusion Criteria
Primarily, the study sample consisted of 74 patients with oncologic history, but 22 patients were excluded: 2 patients were excluded due to poor oral hygiene, 13 patients did not come to the orthodontic practice during the retention period (maintenance therapy), and 7 patients did not come to the orthodontic practice during follow-up (after the retention period had been completed).
Attrition
Primarily, the study sample consisted of 74 patients with oncologic history, but 22 patients were excluded: 2 patients were excluded due to poor oral hygiene, 13 patients did not come to the orthodontic practice during the retention period (maintenance therapy), and 7 patients did not come to the orthodontic practice during follow-up (after the retention period had been completed).
Sex as a biological variable
Materials and methods Study population The study included 52 consecutive cancer survivor patients (29 males, 23 females median age: 19.4 range: 13-28) who had received chemotherapy or chemotherapy combined with radiotherapy in their childhood because of cancer disease.
Subject Demographics
Age: The youngest patient diagnosed with cancer was under 1 year old and the oldest patient diagnosed with cancer was 7 years old.
Randomization
not detected.
Blinding
not detected.
Power Analysis

not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis The data were analysed using Statistica 13.0 software (Dell Inc .	Statistica		Suggestion: STATISTICA (RRID:SCR_014213)(link)

Other Entities Detected

Your Sentences	Recognized Entity

Skeletal Class III 6 Low-angle--0 Normal-angle--5 High-angle--1 6 Low-angle--0 Normal-angle--5 High-angle--1 *U Mann-Whitney test .	Mann-Whitney test
The analysis of variance test with repeated responses was used to assess the statistical significance between the scores.	analysis of variance test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
