Document Identifier: **PMC8646461**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
2.1 Data acquisition In this phase, two datasets were acquired.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
2.2 Data pre-processing All the collected tweets from the first phase have gone through a series of pre-processing steps that subsume: (a) conversion of tweets to lower case character (b) removal of username and URLs, punctuation, links, and tabs, white spaces at the start and end of tweets, stop words (c) expanding of contractions and (d) removal of duplicate tweets.

Number: 2.2 Data pre-processing All the collected tweets from the first phase have gone through a series of pre-processing steps that subsume: (a) conversion of tweets to lower case character (b) removal of username and URLs, punctuation, links, and tabs, white spaces at the start and end of tweets, stop words (c) expanding of contractions and (d) removal of duplicate tweets.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
