Document Identifier: **PMC8647262**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: All the involved institutions and the Institutional Review Board of The University of Lahore, Pakistan approved the study protocols (Ref No: IRB-UOL-FAHS293).
Consent: All participants provided oral and written informed consent before starting the clinical trial.
Inclusion and Exclusion Criteria
Eligibility criteria We consecutively recruited patients with stroke from the neurological rehabilitation unit of University Teaching Hospital of the University of Lahore.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
Methods Trial registration The design of the study was an assessor-blinded two-arm (parallel) randomized controlled trial and was registered in the World Health Organization trial registry IRCT20200127046275N1.
Blinding
Experienced physiotherapists blinded to the group allocation evaluated the patients.
Power Analysis
The sample size was calculated using the following values in OpenEpi calculator: s 1 = standard deviation of HIMTD = 2.68, s 2 = standard deviation of the SCTR = 2.92, D = difference in group means = 1.82, and an equal sample ratio in both groups = 1.
Replication

not required.

Data Information

Availability: 26 The study data supporting the findings are available from the corresponding author on request.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
