SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by Cleveland Clinic Institutional Review Board.
Consent: The requirement for informed consent was waived given the retrospective nature of this study.
Inclusion and Exclusion Criteria
Patients without confirmed PE by imaging and without Doppler assessment of PASP or LVSV evaluated by PERT were excluded from analysis.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All statistical analyses were performed using STATA MP Software for macOS 13 (StatCorp, College Station, TX, version 13.1).	STATA		Suggestion: Stata (RRID:SCR_012763)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Normality was evaluated by the Shapiro-Wilks test.	Shapiro-Wilks test
Categorical variables were evaluated by kh2, and continuous variables were evaluated by the Student t test for mean values or Wilcoxon rank-sum or Mann-Whitney U tests to compare medians.	t test
	Wilcoxon rank-sum
	Mann-Whitney U tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
