SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical Considerations All data were collected after Institutional Review Board (IRB) approval (approval number: CUIRB-2017-0079).
Inclusion and Exclusion Criteria
not detected.
Attrition
Furthermore, 218 individuals were needed to assess the MI between the two groups.
Sex as a biological variable
Participants The target group comprised breastfeeding Korean women at 2 weeks postpartum (1420 days) who voluntarily participated in the survey.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The second survey reexamined the current health status of the baby and breastfeeding adaptation in mothers. 5. Data Analysis Values for the frequency and percentage of the subjects demographic characteristics were calculated, and the mean, standard deviation, skewness, and kurtosis of items and factors were assessed using SPSS version 25.0 (IBM Corp., Armonk, NY, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
To verify construct validity, confirmatory factor analysis was performed using AMOS version 25.0 (IBM Corp., Armonk, NY, USA).	AMOS		Suggestion: AMOS (RRID:SCR_013067)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The following goodness-of-fit indices were used to evaluate the fit of the models: chi-square (x 2), the comparative fit index (CFI cut-off>.900), RMSEA (cut-off<.060), and the standardized root mean residual (SRMR cut-off<.0800) 17,18.	chi-square

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
