SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: The interviews were carried out with their consent, and all the interviews were taped and recorded to prevent any possible omissions.
IRB: Ethical Considerations This study was implemented with the approval of the K University Institutional Research Board (IRB No. K*** 2015-03-003-***) to ensure research ethics.
Inclusion and Exclusion Criteria
After the data were reviewed and modified, 40 Q-samples were finally selected (Figure 1). 2) Selection of the P-samples Several selection criteria for the P-samples were established to organize a Q-population that seemed to clearly represent parenting behaviors for young children.
Attrition
Four categories were selected in this way.
Sex as a biological variable
not detected.
Subject Demographics
Age: According to the criteria, 50 fathers who were in their 20s to 40s, with children between 2 and 36 months of age, were selected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
