Document Identifier: **PMC8669991**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Studies were eligible for inclusion if they were: (a) randomized controlled trials (RCTs) or non-randomized comparative studies assessing TIPS outcomes associated with 8 mm and 10 mm stents (b) patients with cirrhosis portal hypertension and (c) reported DPPG, postoperative HE rates, TIPS dysfunction rates, re-bleeding rates, rates of liver transplantation, andor mortality rates associated with these procedures.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
Studies were eligible for inclusion if they were: (a) randomized controlled trials (RCTs) or non-randomized comparative studies assessing TIPS outcomes associated with 8 mm and 10 mm stents (b) patients with cirrhosis portal hypertension and (c) reported DPPG, postoperative HE rates, TIPS dysfunction rates, re-bleeding rates, rates of liver transplantation, andor mortality rates associated with these procedures.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Study selection The PubMed, Embase, and Cochrane Library databases were queried for all relevant studies published as of September 2020 using the following search strategy: (((transjugular intrahepatic portosystemic shuntTitleAbstract) OR (TIPSTitleAbstract)) AND ((8 mmTitleAbstract) OR (small diameterTitleAbstract))) AND ((10 mmTitleAbstract) OR (large diameterTitleAbstract)).	PubMed		Suggestion: PubMed (RRID:SCR_004846)(link)
	Embase		Suggestion: EMBASE (RRID:SCR_001650)(link)
	Cochrane Library		Suggestion: Cochrane Library (RRID:SCR_013000)(link)
Statistical analysis Statistical analyses were conducted using RevMan v5.3	RevMan		Suggestion: RevMan (RRID:SCR_003581)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
