Document Identifier: **PMC8670579**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Euthanasia Agents: At the end of the experiment, animals were euthanized by exsanguination under anesthesia.
Field Sample Permit: The KU Leuven Animal Care Committee approved the study (P0272016) and the experiments were conducted in line with European guidelines.
IACUC: The KU Leuven Animal Care Committee approved the study (P0272016) and the experiments were conducted in line with European guidelines.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
14 Animals Prepubescent female pigs (aged 3 mo TOPIG TN70, Bilzen, Belgium) weighing approximately 30 kg (average liver weight, 720 g range, 580-866) were housed in single pens with a 12 h light-dark cycle.
Subject Demographics
Weight: 14 Animals Prepubescent female pigs (aged 3 mo TOPIG TN70, Bilzen, Belgium) weighing approximately 30 kg (average liver weight, 720 g range, 580-866) were housed in single pens with a 12 h light-dark cycle.
Randomization
Given the adaptive, stepwise optimization of the experimental methodology, animal allocation to the different phase was not randomized.
Blinding
not detected.
Power Analysis
The sample size was arbitrarily chosen to compensate for the biological variation between experimental units.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
