Document Identifier: **PMC8672172**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
The same two authors independently reviewed the full texts of included articles to assess eligibility for inclusion.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Article selection criteria Articles were managed using the online tool Covidence after the removal of duplicates.
Number: Article selection criteria Articles were managed using the online tool Covidence after the removal of duplicates.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Search strategy A search was performed in PubMed, Embase, Cochrane Library, and CINAHL databases for articles published up to January 12, 2021.	PubMed		Suggestion: PubMed (RRID:SCR_004846)(link)
	Embase		Suggestion: EMBASE (RRID:SCR_001650)(link)
	Cochrane Library		Suggestion: Cochrane Library (RRID:SCR_013000)(link)
Quality assessment Randomized control trials (RCTs) and pseudorandomized studies were independently assessed for risk of bias using the Cochrane RoB 2 tool by two reviewers (17).	Cochrane RoB		
Studies evaluating the inter-rater reliability between patient and clinician joint counts before and after training were evaluated using a recommended modification of the Cochrane ROBINS-I tool for uncontrolled before-and-after studies, as outlined in the Cochrane Handbook for Systematic Reviews (18).	Cochrane ROBINS-I		
	Cochrane Handbook for Systematic Reviews		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
