SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethics approval This study received ethics approval from the Health Research Ethics Board (Pr000074666) at the University of Alberta, Edmonton.
Inclusion and Exclusion Criteria
We excluded patients with BMI above 60 because most patients with BMI in this range have mechanical and functional issues requiring tertiary care.
Attrition
not detected.
Sex as a biological variable
We dichotomized sex as male and female.
Subject Demographics
Age: Study population We included individuals 18 years of age or older with BMI of at least 30 and at least 1 visit with a family physician contributing data to the NAPCReN between July 1, 2016, and July 1, 2019.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
These sources included a combination of laboratory codes, Anatomical Therapeutic Chemical (ATC) codes for medications and the International Classification of Diseases, Ninth Revision, Clinical Modification.	ATC		
Dashboard In collaboration with the NAPCReN and the Physician Learning Program, we created a prototype for a primary care obesity dashboard using EOSS stages in their data presentation tool.	Physician Learning Program		
We conducted all analyses with Python 3.4 (Python Software Foundation) and Stata 16 (StataCorp) software.	Python		
	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
