SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Standard Protocol Approvals, Registrations, and Patient Consents In the present study, review and analysis of deidentified and aggregated data were approved for waiver of authorization by the Western Institutional Review Board (study number 1167406).
Inclusion and Exclusion Criteria
Individuals with that clinical information missing were excluded from that analysis.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Methods Study Population Unrelated individuals aged 18 years and older who were referred for testing using the Invitae Epilepsy Panel from October 2015 through March 2020 were included.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Data Information
Availability: 16 Data Availability The data that support the findings of this study are available from the corresponding author on reasonable request.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
When appropriate, kh2 tests or Fisher exact tests were performed, with p <= 0.05 considered statistically significant.	kh2 tests
	Fisher exact tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
