SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
However, urinary tract infection or other obvious pathology ought to be excluded, in which circumstances anti-infective treatment is the priority.
Attrition
not required.
Sex as a biological variable
The population of interest is females, aged 18 and older, with a diagnosis of primary OAB.
Subject Demographics
Age: The population of interest is females, aged 18 and older, with a diagnosis of primary OAB.
Randomization
Only peer-reviewed randomized controlled trials (RCTs) will be included.
Blinding
not detected.
Power Analysis
not detected.
Replication
After deleting the duplicates , two researchers will independently review the titles and abstracts of studies in compliance with the eligibility criteria .
Number: After deleting the duplicates , two researchers will independently review the titles and abstracts of studies in compliance with the eligibility criteria .

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Eight electronic databases will be searched including PubMed, Cochrane Library, Web of Science, Embase, China National Knowledge Infrastructure, Wanfang Database, VIP Database and China Biology Medicine disc.	PubMed		Suggestion: PubMed (RRID:SCR_004846)(link)
	Cochrane Library		Suggestion: Cochrane Library (RRID:SCR_013000)(link)
	Embase		Suggestion: EMBASE (RRID:SCR_001650)(link)
The initial search strategy for PubMed is shown in Table 1. TABLE 1 Draft search strategy of PubMed Search number Search Details Results 1 "urinary bladder, overactive"[MeSH Terms] 4,812 2 "overactive bladder"[Title/Abstract] 6,585 3 "overactive urinary bladder"[Title/ Abstract] 90 4 "OAB"[Title/Abstract] 3,239 5 "bladder overactivity"[Title/ Abstract] 535 6 "urinary urgency"	MeSH		Suggestion: MeSH (RRID:SCR_004750)(link)
FIGURE 2 PRISMA flow diagram of the study selection process 2.6 Risk of bias in individual studies Cochrane risk-of-bias tool (ROB 2.0) as a reference will be used to evaluate the quality by two reviewers (Sterne et al. , 2019) .	Cochrane risk-of-bias		
Pairwise meta-analysis for direct comparisons will be conducted by STATA.	STATA		Suggestion: Stata (RRID:SCR_012763)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
