SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was reviewed and approved by the Yale University Institutional Review Board. Fig. 1.
Inclusion and Exclusion Criteria
A total of 58 patients were excluded for the following reasons: (1) initial Breslow depth of less than 0.8 mm (n = 37), (2) initial Breslow depth between 0.8 mm and 1.0 mm with decision not to proceed with SLNB (n = 8), or (3) comorbidities that precluded general anesthesia or elected not to proceed with surgical management (n = 13).
Attrition
A total of 58 patients were excluded for the following reasons: (1) initial Breslow depth of less than 0.8 mm (n = 37), (2) initial Breslow depth between 0.8 mm and 1.0 mm with decision not to proceed with SLNB (n = 8), or (3) comorbidities that precluded general anesthesia or elected not to proceed with surgical management (n = 13).
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
McNemars test was used to evaluate for differences in preoperative and intraoperative mapping.	McNemars test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
