SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Patient Consent Statement All patients or their legally authorized representatives gave written or oral informed consent.
IRB: This trial was approved by trial sites through a central institutional review board or local institutional review board or ethics committee at the study site.
Inclusion and Exclusion Criteria
Patients who were on invasive ventilation >24 hours, on ECMO, in shock, or with multiorgan failure requiring treatment in an intensive care unit were excluded.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: We included patients ≥18 years old hospitalized for moderate to severe COVID-19 pneumonia detected by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2)–positive reverse-transcription polymerase chain reaction (RT-PCR) (within 7 days before randomization) and confirmed by chest radiography or computed tomography scan.
Randomization
METHODS Study Design and Patient Population This phase 2, open-label, randomized study was conducted at 26 sites in the United States.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Cochran-Mantel-Haenszel test, stratified by COVID-19 severity at baseline, was used to assess the between-group difference in mortality and incidence of mechanical ventilation by day 28.	Cochran-Mantel-Haenszel test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
