# SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

**Table 1: Rigor Adherence Table**

| |
|---|
| Ethics |
| not required. |
| Inclusion and Exclusion Criteria |
| not required. |
| Attrition |
| not required. |
| Sex as a biological variable |
| not detected. |
| Subject Demographics |
| Age: 2.3 Analytical design We used the Sullivan (1971) method to estimate the remaining number of years to be satisfied with life (i.e., happy LE) and to be unsatisfied with life (i.e., unhappy LE) for those who were aged 50 years and older. |
| Randomization |
| not detected. |
| Blinding |
| not detected. |
| Power Analysis |
| not detected. |
| Replication |
| not required. |

**Table 2: Key Resources Table**

| Your Sentences | REAGENT or RESOURCE | SOURCE | IDENTIFIER |
|---|---|---|---|
| Software and Algorithms | | | |
| The analyses were conducted in Stata 15.0 (StataCorp, 2019). | StataCorp | | Suggestion: Stata, RRID:SCR_012763( link) |

**Other Entities Detected**

| Your Sentences | Recognized Entity |
|---|---|
| Statistical Tests | |
| We conducted a correlation analysis and reported Pearson correlation coefficients between gender-specific happy LE and (1) GDP, (2) inflation rates, (3) unemployment rates, and (4) the poverty ratio. | Pearson correlation |

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
