SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: General written consent of parents for such type of educational research is collected in advance at the beginning of each school year .
Inclusion and Exclusion Criteria
Initial number of components was extracted by criterium Eigenvalue >1; Statements with component loading below 0.50 were excluded from the poll .
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Average age of children in seventh and ninth grade is 12 to 13 and 14 to 15 years, respectively.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
IBM SPSS Statistics , version 25 was used for PCA and IBM SPSS AMOS 24 for CFA and SEM (SPSS Inc , Chicago , IL , USA) .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Spearman’s correlations among statements were examined and statements that correlated with all other statements less than 0.4 and more than 0.8 were deleted from further analysis to prevent error , unreliability , and multicollinearity . 30 Following Kaiser–Meyer–Olkin (KMO) measure of sampling adequacy (>0.70) and Barlett’s test of sphericity (P < .	Spearman’s correlations
	Barlett’s test
To estimate measurement invariance across 2 cohorts (boys and girls; 7th and 9th grade; previous attendance to BLS and AED courses) Wilcoxon signed ranks test was applied in addition to Mann–Whitney U test.	Wilcoxon signed ranks test
	Mann–Whitney U test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
