SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Materials and Methods Compliance with Ethical Standards The ethics review board of the authors' hospital (KBSMC, IRB No. 2020-07-049) approved this study.
Consent: The requirement for informed consent was waived because the study was retrospective in design.
Inclusion and Exclusion Criteria
Cases without SE images were excluded.
Attrition
not detected.
Sex as a biological variable
A total of 38 cases (21 men and 17 women) involving ruptured epidermal cysts and 21 patients (7 men and 14 women) with superficial abscesses were enrolled in this study.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
Analysis of US Images Two musculoskeletal radiologists independently evaluated US images retrospectively, blinded to the pathology results.
Power Analysis
not detected.
Replication
Number: SE was obtained at least twice for each lesion to collect reproducible images.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data analysis was performed using SPSS version 24.0 (IBM Corp., Armonk, NY, USA), and a P-value ≤0.05 was considered to indicate statistical significance.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Height, length, the ratio of height to length, and SE scores were compared between ruptured epidermal cysts and superficial abscesses using the Mann-Whitney U test.	Mann-Whitney U test
The more-than-half-depth sign and submarine sign were compared using the chi-square test.	chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
