SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: After receiving approval from the institutional review board for our health system, patient data were retrospectively collected by searching the following Current Procedural Terminology (CPT) codes: 29891 (arthroscopy, ankle, surgical excision of osteochondral defect of talus and/or tibia), 29892 (arthroscopically aided repair of large osteochondritis dissecans lesion), 29894 (arthroscopy, ankle, with removal of loose or foreign body), 29895 (arthroscopy, ankle, with partial synovectomy), 29897 (arthroscopy, ankle, limited surgical debridement), 29898 (arthroscopy, ankle, extensive surgical debridement), and 29899 (arthroscopy, ankle, with ankle arthrodesis).
Inclusion and Exclusion Criteria
There were 47 cases that did not have a pathology report available; these cases were excluded from the analysis.
Attrition
Six of these did not have documentation of a pathology report available for examination.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
They were not blinded to the preoperative diagnosis.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
