SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Following parental signed consent , children were measured , and socio-demographic information was recorded.
IRB: The study was approved by the ethics committee of the Esperanza University Hospital, University Francisco Marroquin, Guatemala.
Inclusion and Exclusion Criteria
(Epi Info StatCalc 7.2.3.1) . 2.2 Participants , inclusion criteria and recruitment All families with children aged 6-72 months of age living in the study sites were invited to take part in a nutritional screening programme coordinated by the non-governmental organisation APEVIHS (Asociacion Para la Prevencion y Estudio del VIHSIDA) with approval of the local authorities .
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Participants received an atole + MN, or lactose-free milk (henceforth referred as milk), over 18 months with a 7:3 ratio of intervention to control.
Weight: The full dose of atole + MN (18.75 g) supplied nearly twice the RNI for zinc and iron so that 10 g would fully meet the childs requirements.
Randomization
Participants were allocated to intervention (70) and control groups (30) using a computer-generated random allocation procedure stratified by community and age group .
Blinding
not detected.
Power Analysis

not detected.	
Replication	
not required.	
Protocol Information	
Identifiers: 2 METHODS 2.1 Study design and sample size This was an open-label RCT (Registration NCT01643187) conducted between 2012 and 2013 in the southwest region of Guatemala in 18 rural communities and one urban district, San Felipe, Retalhuleu.	NCT01643187

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
2.4 Statistical analysis Data were analysed using the Statistical Package for the Social Sciences (SPSS) software , Version 24 .	Statistical Package for the Social Sciences		Suggestion: SPSS, RRID:SCR_002865(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Bonferroni correction method was applied, dividing the conventional threshold for statistical significance (0.05) by the number of statistical tests performed.	Bonferroni

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
