SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by the ethics committee of Arnhem-Nijmegen under registration number NL65917.091.18 and registered in the Dutch Trial Register as NL6435 (https:www.trialregister.nltrial7217).
Consent: Participants Adult patients visiting the rheumatologist with established gout or a high clinical suspicion of gout were invited to participate until 30 patients gave written informed consent.
Inclusion and Exclusion Criteria
Furthermore, patients were eligible for participation if they had at least had one self-reported arthritis attack in the past 3 months, possessed an Android or iOS-based smartphone and were able to communicate in Dutch.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All data were analysed using STATA v.	STATA		Suggestion: Stata (RRID:SCR_012763)(link)
13.1 (StataCorp, College Station, Texas).	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
