SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol and protocol amendments were reviewed and deemed exempt by the University of Michigan Institutional Review Board.
Inclusion and Exclusion Criteria
We excluded individuals with less than 12 months of continuous enrollment to require sufficient claim history.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Sample Selection All individuals 18 years of age and older at the time of their enrollment, which could start from 2007 to 2017, were potentially eligible for this analysis.
Randomization
Among remaining members without MS, we obtained a 20% simple random sample of general population controls, using a fixed randomization seed.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All analyses were conducted using SAS statistical software, version 9.4 (SAS Institute).	SAS		
	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
