SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Institutional review board (IRB) approval was obtained prior to collecting the data .
Inclusion and Exclusion Criteria
Inclusion Criteria * Patients who underwent operative hip fracture repair , with either hemiarthroplasty , intramedullary nail treatment , or sliding hip screw treatment .
Attrition
Age of 59 years or younger . * Patient with previous hip arthroplasty or periprosthetic proximal femur fracture * Patient who required a pre-operative blood transfusion due to symptomatic anemia Initially , 511 patients were identified and after using exclusion criteria , 505 patients met inclusion criteria for this study .
Sex as a biological variable
+- 9 P = 1 BMI , kgm2 (SD) 24.4 +- 5.3 25 +- 6.7 P = .26 Gender , male 88 (28.7) 63 (31.8) P = .45 Gender , female 219 (71.3) 135
Subject Demographics
Age: * Age of 60 years or greater .
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
05. Microsoft Excel was used for some calculations.	Microsoft Excel		Suggestion: Microsoft Excel, RRID:SCR_016137(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Additionally, a 2x2 Chi Square analysis was performed with significance set to P <.	Chi Square
Since these data were continuous, an unpaired 2 tailed t-test was utilized.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
