SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Exclusion criteria included prior surgery and palliative intent of the treatment.
Attrition
Twenty-three patients (23 11.1) were treated with neoadjuvant chemotherapy in addition to concurrent systemic therapy, in which cisplatin was used as a sole agent in all of the cases (23 100).
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The statistical analysis was performed using the STATISTICA 13.3 by TIBCO Software Inc.	STATISTICA		Suggestion: STATISTICA (RRID:SCR_014213)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Cut-off values in the log-rank analysis were based on Youden index 22.	log-rank

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
