SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by the human subject ethics board of Medicine, Tri-service General Hospital, Taipei, Taiwan and was conducted in compliance with the principles of the Declaration of Helsinki for biomedical research involving human subjects, as revised in 2013.
Consent: Written informed consent was obtained from each patient prior to treatment.
Inclusion and Exclusion Criteria
The inclusion criteria for treatment were: good systemic health of the patient, maxillary anterior teeth (first premolar to first premolar), no periodontal disease or gingival recession, and no endodontic lesions with facial plate perforation or dehiscence, the presence of enough teeth in the maxillary arch to register the jaw to the navigation computer system.
Attrition
not detected.
Sex as a biological variable
Materials and methods Patient recruitment A total of ten patients (three males and seven females; age range, 29 years–56 years) who required at least one implant in the esthetic area treated with post-extraction socket implant placement participated in this study (Fig. 1).
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
