SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: The bodies were donated to the Division of Clinical and Functional Anatomy at the Medical University of Innsbruck, Austria, following pre-mortem informed consent for their use in scientific studies (McHanwell et al., 2008; Riederer et al., 2012).
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
We investigated 52 upper extremities of 26 human cadavers (14 female and 12 male).
Subject Demographics
Age: The mean age of the specimens was 78 years (range: 58–93): the mean age for female specimens was 79 years (range: 58–92) and for males 77 years (range: 59–93).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Number: Three independent observers performed measurements to the nearest millimetre using a steel engineering rule and measuring tape.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Measurement data were entered into an Excel spreadsheet (Microsoft Office 2010; Excel 14.6.6) and recorded as mean values, and minima and maxima.	Excel		
Statistical analysis was performed with the statistical program SPSS for Windows, version 11.5 (SPSS).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
